Career Grades are a tool to help make comparisons between occupations. Each occupation is assigned a letter grade from A+ to F based on outlook over the next decade. **Grades are based on a combination of projected total job openings, projected percent growth, and average wages.** Occupations with a grade of A or A+ have above average results in at least two of the three variables, while occupations with a grade of B or B+ have above average results in at least one of the three variables.

The Northeast region is projected to have more than 7,200 annual job openings through 2030. The vast majority (99%) of these openings are in A, B, and C grade occupations. In general, higher graded occupations earn more and have higher growth rates. Grade A occupations earn an average wage that is 52 percent higher than the average wage for all occupations, and are projected to grow more than six times faster than the average growth rate.
